AID FOR THE FARMERS.

Portion of Postal Savings Bank Funds Is Made Available for Loans.

To help farmers to meet the war food crisis a portion of the \$125,000,000 deposited in the postal savings banks of the United States has been made available, the trustees of the postal savings bank system having adopted a resolution making farm loan bonds, issued under the federal farm loan act, acceptable at par to secure postal savings deposits.

The federal farm loan board is in receipt of many reports from all parts of the nation indicating that the farmer is making desperate efforts to respond to the nation's appeal to increase food production, but that he is greatly handicapped by the shortage of labor and the high price of seed. He needs more capital with which to purchase seed and he needs additional capital to provide himself with labor-saving machinery to overcome the labor shortage.

Applications for loans have already been received which indicate that the farmers will need more than \$100,000,000 of capital through this agency this year. Only 5 per cent will be charged. It was money, where previously, rates of from 5½ to 15 per cent have been charged.
